

Renewables & Flexibility

PRODUCTS & SERVICES

What we can do for you

Scholt Energy has been designated various **market roles** with the approval of the national grid operators.

Balance
Responsible
Party (BRP)

Balancing
Service
Provider
(BSP)

Congestion
Service
Provider
(CSP)

As **aggregator**, Scholt Energy bundles the flexibility of multiple small and large consumers and generators into **a portfolio** and offers the combined capacity on the spot, futures, balancing and/or congestion markets.

(C)PPA

CURTAILMENT

GUARANTEES OF ORIGIN

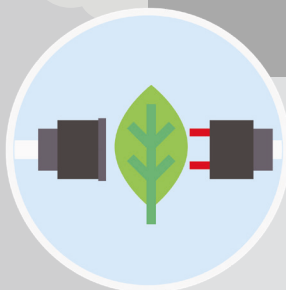

ENERGY STORAGE

CHARGE MANAGEMENT

DEMAND RESPONSE

As a business energy partner, we are more than just an energy supplier. We are **specialists** in sustainable energy procurement and sales. For instance, we conclude Corporate Power Purchase Agreements between producers and customers. moreover, we also support businesses with sustainable energy procurement with 'guarantees of origin'.

In addition, we have become a **major player** in flexibility services such as energy storage, curtailment, demand response and charge management. we offer these services in the Netherlands and Belgium and aim to include Germany and Austria in the near future.

EXAMPLES

Who we can do it for

Are you a producer of sustainable energy, owner of flexible assets such as a battery or a solar installation?

If so, we can look at a **customised business case** and/or earning model with you. For more information, please visit **our website** or connect with one of our energy transition specialists during events throughout the year.

Scholt Energy closes multiple Corporate Power Purchase Agreements with charging giant Fastned.

Scholt Energy uses cogeneration from biogas installation Green Create to balance the power grid.

Charging of electric trucks made possible despite grid congestion thanks to Charge Management.

Scholt Energy closes Corporate Power Purchase Agreement with waste handler Attero for two solar parks.

Scholt Energy trades with 10 MW Zuidbroek battery park in the Netherlands on the imbalance markets.

ENERGY PARTNER TO:

OUR VIRTUAL POWER PLANT

Offering flexibility services

We assist asset owners to **monetize** their **flexibility** and support the transformation of the energy network by integrating renewable energy and providing **balancing services**. We aspire to manage the future renewable energy grid.
